ANNUAL REPORT  
OF THE  
BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL

*For the Year Ending December 31st, 1903.*

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 2, 1904.

To His Excellency W. W. Heard, Governor of the State of Louisiana and Ex-officio President of the Charity Hospital Board of Administrators:

*Your Excellency*—The annual report of the Board, herewith submitted, furnishes a brief statement of the year's work, and of funds expended for its maintenance and support.

The disbursements for the year 1903 amounted to \$134,919.47, and the income to \$139,236.46, leaving a surplus in the general fund of \$10,973.47. At the last annual meeting it was stated that there remained a cash balance of \$8,756.99. The expenditures during the past year exceeded those of the preceding year by \$9,891.34. By referring to the comparative statement of disbursements for the respective years of 1902-03, embodied in the Treasurer's report, this is satisfactorily accounted for.

It must not be concluded from the surplus remaining over that the income is in excess of requirements. But for the surplus at the close of the preceding year the cash balance carried over in the fund for the coming year would not have exceeded \$2,000.00.

The enlargement of the corps of Nurses will greatly increase expenditures. Twenty have been added since the last report, and they will number seventy-five at the end of the year as stated by the Directress.

There is also to the credit of the special fund \$36,944.36. This fund is composed of donations and legacies. It is from this fund that the many important adjuncts to the Hospital have been constructed, and by it we are enabled to keep in line with hospital development throughout the world.

There were 8,201 admissions, and 615 remaining over, making a total of 8,816 treated during the year. Of the admissions 4,851 were whites and 3,350 colored. Of those treated 7,045 were discharged, 600 remaining over. The number of deaths amounted to 1,175. This included 388 cases dying within thirty-six hours, and 197 for coroner's inquests. The amphitheatre cases amounted to 4,519, and 1,306 major operations were performed. The ambulance calls numbered 1,596. The gross death rate was 13.5, and the actual death rate was 9½ per cent.

In the Maternity Departments, white and colored, 236 women were confined. In the Outdoor Clinics, men and boys, 10,377 new patients applied and 35,742 consultations were given. In the Women and Children's Clinics 8,965 were treated, and 37,329 consultations were given.

The improvements during the year were many, for details of which you are referred to the House Committee's report. They consist in the main in an extension from the east wing for lavatories, baths and closets; in the thorough renovation of the Ambulance yard and doorway; in the perfection of the system of fire extinguishers throughout all the buildings; in the substitution of a new telephone system for the old, which had ceased to be satisfactory and which now connects every department of the Hospital; in the establishment of a Pasteur Institute, in connection with the Charity Hospital, whereby a long-felt want is supplied, and which marks an epoch in its history.

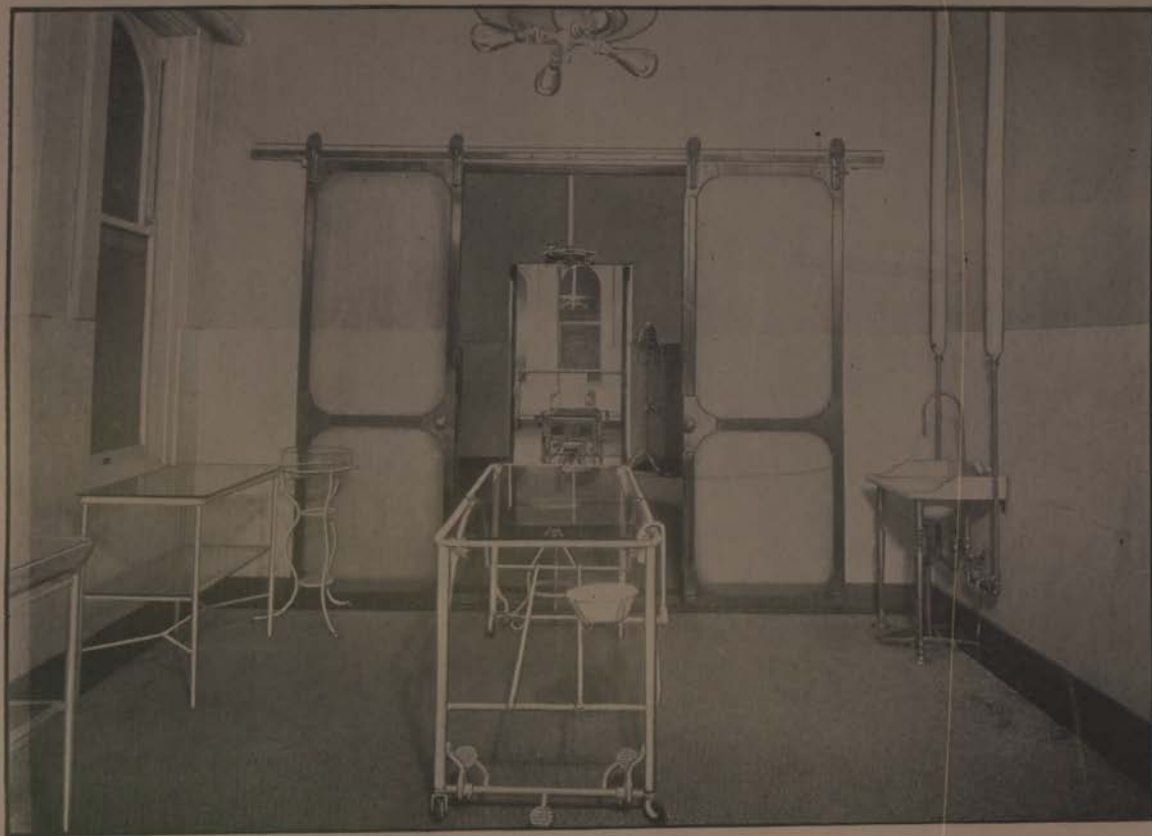

The credit of this undertaking is due chiefly to Mr. Valloft and to the painstaking investigation of the committee composed of Messrs. Valloft, Wiegand and Dr. Bel, who convincingly showed in their elaborate report to the Board its practicability

and feasibility from an economical point of view. Much credit is also due the gentlemen in charge, Drs. Pothier and Couret, for their unselfishness in accepting this additional work for but little increase of salary; the installation of the plant and preparation of rooms has not exceeded \$650.00 in cost. It has been ready to receive and treat patients exposed to rabies since December 20. Since January 1 nine patients have been under treatment.

Its establishment has been favorably commented upon by the press throughout the State, and already we have had evidences of its popularity with the general public in donations received. From the Duke D'Abbruzzi and the Italian colony, \$1,000.00; from the Committee of Arrangements of the American Medical Association, \$700.00; from the police jurors of Lafourche and Terrebonne, \$100.00 each, and from two Texas children treated at the Institute \$35.00. The latter was a voluntary gift, as no charge is permitted for treatment.

The resignation of Dr. J. D. Bloom created a vacancy in the House Surgeonship. His withdrawal was regretted by the Board, as he had served with distinction and with faithfulness, and was identified with many of the most important improvements. The House Staff is composed at present of Dr. J. M. Batchelor, promoted to the position of House Surgeon; Dr. J. A. Danna, to the position of First Assistant, and Dr. S. W. Stafford, to the position of Second Assistant, made vacant by the promotion of Dr. Danna. The new House Surgeon and his Staff have worthily and faithfully discharged their duties to the entire satisfaction of the Board, and we return them our sincere thanks.

After the resignation of Dr. J. D. Bloom, and before the appointment of his successor, a resolution was unanimously adopted by the Board limiting the term of House Surgeon's service to six years. We would solicit the aid of your excellency in securing some legislative enactment to make this binding. It was favored by the entire medical profession of the State. It

OPERATING ROOMS—A. B. MILES AMPHITHEATER.

would stimulate the zeal and ambition of the Assistant, who would have certain hopes of promotion, if qualified, and would prove of advantage to the service.

Our thanks are extended to the heads of the various departments, Drs. O. L. Pothier and Couret, W. T. Taylor, J. R. Leake and John Ponder; to the visiting physicians and surgeons; to our Secretary and Treasurer, Edwin Marks; to our attorneys, Farrar, Jonas & Kruttschnitt; to the generous friends who have remembered the institution; to Sister Agnes and her co-helps for their invaluable services, which are most deeply appreciated; to the young ladies of the Training School, selected with care by the Directress, and to their Superintendent, Sister Dolores. We also return thanks to the Resident Students and Ambulance Corps and to all employes of this great Hospital.

In concluding, I desire to express my personal thanks to my colleagues, who, in committees, do the chief work of the Board, and especially to the chairman of the Finance and House Committees, R. E. Craig and John T. Gibbons.

E. S. LEWIS, M. D.

## Annual Report of the House Committee.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 1, 1904.

To the Board of Administrators:

*Gentlemen*—We respectfully present a synopsis of the work and improvements of the past year, condensed as follows:

A new construction has been added to the east end of the main building, costing \$2,439.00, complete in every respect, and containing sanitary water closets, baths and wash stands. The work was done under the supervision of Chief Engineer Ponder, at the minimum cost mentioned.

The facilities of the laundry have been increased by the addition of a modern washing machine.

The Female Department has been equipped with two additional dressing rooms, and the Male Department with one, all complete with lavatories.

The Ambulance yard and drive-way have been thoroughly renovated and repaved—a substantial, well-executed work.

The Hospital buildings have been additionally safe-guarded against fire by an increased number of modern fire extinguishers, hose and appliances, lessening the risk from possible accidents.

The old interior system of House Telephones has been substituted for by one of the latest devised, furnished by the Interstate Electric Co., and which is pronounced the best in use.

Your Committee have assisted the Medical Committee in the furnishing of auxiliaries, such as a refrigerator cabinet, used in the Pasteur treatment and additionally lavatories for the same work.

The ordinary work of painting, kalsomining and renovation of the buildings has been attended to during the year.

The Committee have again to commend the enlightened zeal and efficiency of Chief Engineer Ponder in his large department. He is an earnest, conscientious officer of the Institution.

Respectfully submitted,

JOHN T. GIBBONS,  
LOUIS ED. VALLOFT,  
WM. G. VINCENT.

*House Committee.*

## Annual Report of the Finance Committee.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 1, 1904.

To the Vice President and Board of Administrators:

*Gentlemen*—Your Finance Committee respectfully report that the accompanying statement, prepared by the Treasurer, has been duly examined by the special Committee appointed for that purpose, and by them found correct.

The said statement gives a full history in detail of all the receipts and disbursements during the year 1903, and shows an increase in receipts of \$13,194.25; and an increase in expenditures amounting to \$9,900.34; and we have at the end of the year a surplus in the General Fund of \$10,973.92, making \$2,216.93 more cash in the General Fund than we had at the same time last year. The employment of additional Trained Nurses, the maintenance of the Pasteur Institute, recently established by your Board, and the payment of the premium for the next three years on \$246,700.00 insurance, expiring 19th of February, will make this increase timely indeed.

The greatest increase in receipts is shown in the following accounts in the Treasurer's statement:

Slaughterhouse fees.....	\$ 849 59
Licenses.....	915 00
Gate fees.....	262 55
State appropriation.....	2,500 00

While the greater portion of the increase in expenditures appears in the following accounts of the statement:

Meat.....	\$ 712 17
Fuel.....	1,126 15
Milk.....	364 41
Groceries.....	795 94
Medical and surgical supplies.....	1,036 50
Pathological department.....	1,235 15
Employes.....	1,727 80
Training School for Nurses.....	1,806 00
House Furnishings and Dry Goods.....	2,217 69

There is to the credit of the Special Fund, \$36,944.36, against \$34,795.21 at the same date last year. As mentioned in our last report, this fund is created by donations and legacies, and is used for the purpose of erecting new buildings and making other permanent improvements, and is added to from time to time by benevolent friends of the Institution. A list of the contributors to this fund is part of the Treasurer's report.

Respectfully submitted,

R. E. CRAIG,  
HUNTER C. LEAKE,  
G. A. WIEGAND,

*Finance Committee.*

ANNUAL STATEMENT OF CASH RECEIPTS AND  
FOR THE YEAR ENDING

## RECEIPTS:

flowers.  
United Fruit Co., twenty bunches bananas.  
Mrs. W. Barry, six dozen drinking glasses.  
Master Henry Abraham, 12 Rosa Park, toys for children.  
W. B. Saunders Co., Philadelphia, Pa., two copies medical  
works.  
Tillie Livingston Preston, Hot Springs, Va., books and  
painting material.

## Annual Report of the House Surgeon.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 1, 1904.

To the Vice President and Board of Administrators:

*Gentlemen*—I have the honor to report on the status and management of the Medical Department of the Hospital for the year 1903 and to transmit the annual records for the same.

December 31, 1903, 615 patients remained under treatment; during the year just expired 8,201 received admission, making a total of 8,816 patients treated indoors. The admissions were twenty-five in excess of the previous year, and have been exceeded but four times in thirty-five years. This is to be ascribed to the city's growth and increased population, and a consequent increased hospital clientele. Division by race and sex of patients admitted, exhibits 4,791 white, 3,410 colored; male, 5,171; female, 2,409; children, 621; (white, 479; colored, 142).

Of the 8,816 inmates 7,045 were discharged cured, improved or stationary, 1,171 died, and December 31 600 remained in the wards.

The total mortality, 13½ per cent., though slightly less than that for 1902, shows but little variance from that of preceding years. Many patients were admitted in a moribund condition, and served but to increase an otherwise moderate death rate, 9½ per cent.

The coroner viewed 197 bodies; 388 patients died within thirty-six hours after admission. In the outdoor clinics 19,302

new patients sought and obtained relief; 10,337 men and boys, 8,965 women and children, and 73,071 consultations were granted.

The Ambulance Service has been maintained at its highest standard of efficiency, and it gives me sincere pleasure to commend the Corps of Ambulance Surgeons for faithfulness and zeal in the discharge of their duties. Prompt response to calls and rapid transportation of the injured has been characteristic of this service. Fifteen hundred and ninety-six calls were made; many were not needed; but it were better to answer many that were not needed than neglect one needed.

Accident and emergency work in the A. B. Miles Amphitheatre has surpassed that of any previous year. A summary of this work represents immediate treatment of 4,519 accident cases, with a total of 1,306 major operations performed. Chloroform was administered 1,306 times, ether five times, spinal analgesia practiced twelve times, and local analgesia employed 187 times.

In the Maternity Wards the care of parturient women has been accomplished with satisfaction, and we are gratified to call your attention to the low death rate of 2.1 per cent. In this service 237 children were born.

The Department of Pathology and Bacteriology, recently renovated and thoroughly equipped with all paraphernalia necessary to accurate investigation, has been ably conducted by the Pathologist, Dr. O. L. Pothier, and his assistant, Dr. M. Couret. We desire to express our appreciation of their valuable service and devotion to the work.

By your direction all drugs and pharmaceutical supplies have been purchased from the lowest bidder, with appreciable reduction in the expenditures of that department. The chemist, Mr. W. T. Taylor, deserves commendation for economical and efficient management.

The important work of selecting and preserving desirable medical data has been inveterately pursued.

The Registrar reports having filed 1,101 clinical histories, classified as follows: Medical, 502; Surgical, 444; Gynecological, 155.

The Training School for Nurses, upon which special reports have been addressed to the Medical Committee, has passed a year of healthy growth. The number of pupils reached its maximum in the last term, numbering sixty matriculates.

The large number of sick children treated during the year in the Richard Milliken Memorial serve to emphasize the usefulness of this adjunct, and must occasion much gratification to the generous founder.

No year has witnessed improvements of greater moment than the year considered in this report. The great achievement has been the founding of the Pasteur Institute for the treatment of rabies. The need of such an institution has been long felt, both by the Board of Administrators and the public. Formerly patients of this class were obliged to seek treatment at great distance from home, with the loss of much valuable time, and many were dependent on public contributions to enable them to secure treatment at one or another of the few institutes in this country. By this act of the Board, treatment is placed within the reach of the poorest.

During the short time of its operation nine patients have undergone treatment, five of whom were from other States. Its potentiality for good cannot fail to increase with time, and must impress the thoughtful observer.

The occupation of the Hutchinson Home for Female Trained Nurses permitted expansion of wards for the sick. One additional ward was opened to gynecological patients, a matter of great necessity; one other ward was opened to white female surgical patients, also greatly needed, and one ward was assigned to colored children, thereby greatly facilitating the treatment of these. Two wards were added to the colored male surgical division, meeting, in a measure, the increased demand for space in

that subdivision. This service is still overcrowded and inadequate to the needs of the institution. The health and comfort of both white and colored inmates have been greatly augmented by the erection of the Annex to the East End of the Main Building, in which are provided modern lavatories, bathrooms and sanitary closets. This improvement was much needed and most timely.

The lighting in the Amphitheatre Operating Rooms has been improved by rewiring and substituting electric lamps of improved pattern for those formerly used. The new Intra-mural Telephone System, just installed, in place of the old and unsatisfactory mechanism, is an improvement of value.

Realizing the responsibility imposed in safeguarding Hospital inmates from possible disaster by fire, further improvements have been made with a view of minimizing such a danger. Additional water pipes, with hose attached, have been conducted into the Pathological Department and the two Outdoor Clinic Buildings, and, to further perfect means for subduing an incipient conflagration, chemical fire extinguishers have been placed at numerous and convenient points on every floor of every building.

The Domestic Department has been managed with the same economy, faithfulness and charity that has always characterized the Sisters of Charity in charge. They merit approval and grateful thanks.

While the list of improvements within the means at hand is long, there yet remain many problems to confront your honorable body. Foremost among these is the urgent necessity for greater ward room for colored male surgical patients. These wards are overcrowded to the prejudice of the health and comfort of the sick and to the great embarrassment of efforts at surgical treatment. More wards are positively a necessity. The erection of a Mansard roof on the main building, a plan often mooted, would solve the question. A fourth floor on the main

building would permit a rearrangement of wards and would afford ample space for years to come. I respectfully submit this for your consideration.

Scarcely less important is the need of a building for the isolation of those infectious diseases received by the Hospital. The management is severely taxed to safely isolate such patients.

I desire to recommend reorganization of the Externe Service in the Outdoor Clinics. Its present organization is entirely unsatisfactory and fails to meet the ends contemplated when inaugurated. No student should be allowed to stand for examination who has not successfully stood the examination of second course students at the Tulane Medical College.

To secure punctual attendance and to encourage faithfulness and zeal in the discharge of their duties, I further recommend that all externes who have performed their duties with intelligence and to the satisfaction of the Medical Committee be allowed ten points in their favor in the examinations for interne, this rule to become operative at the examination for interne in 1905.

In the management of the medical affairs of the Hospital, I have had able and willing assistance from my fellow-workers and assistants, Drs. J. A. Danna and W. S. Stafford. To the clerk, James R. Leake, praise is due for accuracy and promptness in the compilation of Hospital records. John Ponder, Engineer, rendered efficient service and merits thanks.

The Hospital management has endeavored to bear in mind the humanitarian character of the duties imposed and to dispense charity, where due in its least repugnant form.

Respectfully submitted,

J. M. BATCHELOR,

HOUSE SURGEON.

## Pathological Department.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 1, 1904.

To the Board of Administrators of the Charity Hospital:

*Gentlemen*—I have the honor to submit the following report of work done in the Pathological Department for the year 1903:

Specimens of urine examined .....	8,738
Specimens of blood examined. ....	2,959
Specimens of sputa examined.....	1,056
Specimens of cultures examined.....	219
Specimens of tissues examined .....	174
Specimens of pus examined.....	97
Specimens of feces examined.....	128
Specimens of fluids examined. ....	38
Specimens of stomach contents examined.....	19
Specimens of exudate examined.....	2
Specimens of membranes examined... ..	1
Specimens of secretions examined.....	6
Specimens of granulations examined.....	1
Specimens of calculi examined.....	2
Photographs and skiagraphs taken .....	174
Autopsies held.....	186
	13,800

During the past year there has been a marked increase of the general routine work of the Department, a slight decrease in the number of photographs taken, and of the autopsies held.

During the year the Department has been entirely renovated, a new incubator and steam sterilizer purchased. These

INSTRUMENT ROOM — A. B. MILES AMPHITHEATER.

changes have greatly facilitated the work of the Department. The museum was re-arranged so as to give more light and a better display of the specimens.

In October, by special resolution, a Pasteur Institute was added to the Pathological Department, and the proper changes made to accommodate it. The virus was obtained in June from the Pasteur Institute of Baltimore, from Dr. N. G. Keirle, by Dr. I. I. Lemann, who donated it to the Hospital. This virus has been kept alive since June in the Department, and is the one that we are now using.

Before closing this report I wish to call attention to the increase of the work of the Department, and that the need of another assistant is becoming more and more urgent. For the past eight months we have been dependent on the assistance of gentlemen who were willing to assist in the work of the Department.

In closing, I wish to commend the services rendered by the Assistant Pathologist, Dr. M. Couret, also the assistance given by the Resident Students detailed to the Department during the year, and thank the House Surgeon, Dr. J. M. Batchelor, in facilitating the work of the Department.

Respectfully,

O. L. POTHIER, M. D.

PATHOLOGIST.

## Report of Directress.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, December 11, 1903.

To the Members of the Medical Committee, Charity Hospital Board of Administrators:

*Gentlemen*—With the close of the ninth session of our Training School for Nurses, covering a period of ten years, and in which time one hundred and nineteen young women have qualified to the purpose of a professional nurse, I feign naught but the pleasure of labor, that was preparatory, adaptive and incalculable to the moral good in ministration and benefit to our sick poor and responsive to our people and State. The School's progress has been uninterrupted, and through the benefaction of the A. C. Hutchinson Memorial the fulfillment of every facility and provision has been assured. Each session has contributed to a widening of its reputation through the excellent character and work of its many graduates. The notable stride in the School's advance for the year relates to its new home with every modern equipment for practical lessons as well as its didactic course, and the improved class discipline in study and review that adds greater merit to the teaching corps and associates the pleasure of this report. Furthering the advantages thus obtained in the proficiency of our pupils, rudimentary and preparatory details have been given a greater value in class promotion—a true, practical good obtainable by service thus secured in helpful aid to the sick, and confirming the fitness of the nurse.

With this accomplished, the School's foundation is substantially established, and its true value as a medical and educa-

tional adjunct is affirmed. That the School enjoys in measured form a reputation worthily deserved, is confirmed by the continued large number of applicants to its classes, and which, during the past year, was three hundred and sixty. At the present time sixty pupils comprise the School's attendance. The capacity of the Home is being gradually met, proportioned to the increase of seniors to thereby obviate the outnumbering of probationers and necessarily inexperienced. The course of three years now adopted by the many schools of the North is not warranted from the standpoint of our statistics upon the failing health of pupils by Hospital confinement in our climate, and though the three-year course has its benefits to the institution and pupil, I fear if it were encouraged the serious impairment to their physical health would materially lessen the number of applicants to draw from. Again, our nurses are not permitted to do other than hospital work, securing, thereby, the full discipline of a large hospital training. The gradual increase in the graduating class is shown for the present year in its number of twenty, and the promise for the year 1904 of twenty-six. Of the applicants during the year, thirty-nine were accepted; fourteen pupils were released during the session. The accepted for the coming year's junior class numbers fourteen at the present time; the class is to be completed from the applications on hand. I have the kindest expressions to make for the graduates of to-day, for their work and character my praise is unhesitating, and with it I give my affectionate well wishes.

In the School's prominence and success the corps of Lecturers have contributed much; their aid and valued suggestions have been a potent factor to this end—they are deserving of our praise and gratitude. The resignation of Miss A. F. Huyghe as Superintendent, after several years of intelligent service, has made again possible the order previously practiced with excellent results of the appointment from our senior graduates. The several auxiliary branches of teaching have been full and satis-

HOSPITAL KITCHEN.

factory. The invalid cooking course has been covered, and Miss L. Wooden, instructress in massage, has given an excellent series of demonstrations in this branch.

In your Board's worthy purpose my efforts are ever enlisted, and for their consideration and courtesy I beg to thank them.

The passing year has deprived us, by resignation, of one whose counsel and valued aid were most highly appreciated by all. I refer to Dr. J. D. Bloom, who, from its commencement has been associated with this work, and whose loss we most sincerely regret.

In my duties and the School's work I beg to give expression of thanks to Dr. J. M. Batchelor, our House Surgeon, and Assistants, Drs. J. A. Danna and S. W. Stafford, for their assistance and favor.

The material good towards which this institution strives in accomplishment is fostered by a righteous prompting; its charity and God-like spirit represent so much to enlist full favor and indulgent support.

Respectfully submitted,

SISTER AGNES,

DIRECTRESS.

SISTER DOLORES,

SUPERINTENDENT.

## Report of the Chairman of the Faculty.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, December 11, 1903.

To the Vice President and Members of the Board of Administrators of the Charity Hospital:

*Gentlemen*—It is now ten years since the establishment of the Training School for Female Nurses in this Hospital. From a small beginning the School has increased annually, and is now grown to full proportions with sixty pupil Nurses on the roll.

This occasion marks the ninth anniversary of graduation, and I now formally present to you, the Graduating Class of 1903. These young ladies have served the long apprenticeship patiently and well, and at the bedside of the sick have studied the art of nursing; have learnt to interpret symptoms of disease, to allay pain and fear, to sooth the restless and to subdue the sickly fancies that crowd upon the brain of the weak and fever-stricken.

Having studied at the bedside the clinical aspect of disease and in the lecture-room followed the teaching of the Faculty of Lecturers, they successfully passed all examinations and are recommended as worthy of the stamp and approval of diplomas at your hands.

As evidence of the excellent course of lectures given and of the thorough work done by the class, I desire to refer your attention to the collection of written lectures on every branch taught, and to the clinical records and temperature charts now on exhibit in the adjoining room. The Cooking School also has its exhibit—the work of individual nurses in invalid cooking.

To the gentlemen composing the Faculty of Lecturers I desire to express my full appreciation of the valuable aid they have given in perfecting and sustaining the course of didactics.

To our Directress, Sister Agnes, all credit is due for the kind and motherly care thrown around the young ladies of the School, as well also for the devotion and fostering care she has manifested towards all things pertaining to the School's welfare.

To my assistants, Drs. J. A. Danna and S. W. Stafford, I acknowledge grateful appreciation for work well done.

Respectfully submitted,

J. M. BATCHELOR,  
HOUSE SURGEON.

## REPORT OF OUTDOOR DEPARTMENT, 1903.

Aspiration.....	1			1 Abscess of Lung.
Aspiration.....	1			1 Tubercular Abscess.
Aspiration.....	1			1 Ascites.
Conservative Operation.....	1			1 Railroad Injury of Leg.
Conservative Operation.....	1			1 Machine Injury of Hand.
Cauterization.....	2			2 Cancerum Oris.
Cauterization.....	1			1 Ulcer of Rectum.
Wiring.....	1			1 Fracture Patella.

## SUMMARY OF OBSTETRIC CASES IN 1903.

There were 236 cases of Obstetrics.

White .....	119	Multiparae.....	92
Colored .....	117	Primiparae.....	144

## PRESENTATIONS.

## POSITIONS.

Vertex.....	Left Occipito-Anterior.....	113
	Right Occipito-Anterior.....	61
	Right Occipito-Posterior.....	13
	Left Occipito-Posterior.....	6
	Uncertain.....	22
	Face.....	3
		218
Breech.....		12
Shoulder.....		3
Foot.....		5—20
		238

## MANNER OF DELIVERY.

Naturally.....	212
By Forceps.....	15
By Podalic Version.....	5
By Traction.....	4
By Caesarian Section.....	—
	236

There were 3 cases of Twin Pregnancy.

There was ... case of Triplets.

## MORTALITY OF MOTHERS.

Of the 236 cases, 5 mothers died, making a mortality of 2.1 per cent.

## CAUSES OF DEATH.

Puerperal Eclampsia.....	3
Placenta Previa.....	—
Septicemia.....	2
Exhaustion and Shock.....	—
Uremia.....	—
Post Partum Hemorrhage.....	—
	5

The number of children born were 239.

Male.....	138	Living.....	211
Female.....	101	Still-born.....	28—239
